

**Protein Crystallography**

**Gryphon**

Protein Crystallography  
Lipidic Cubic Phase Option

**Crystal Phoenix**

Protein Crystallography  
HTS / Genomics

**Scorpion**

Screen Building  
Combinatorial Compound Assays

**CrysCam™**

Protein Crystal Observation

**CrysCamplus**

Protein Crystal Observation  
with visible and UV-light

**CrysCamUV**

Protein Crystal Imaging  
with visible & UV-light and  
fluorophore option

**Chemistry and general liquid handling**

**Phoenix  
for the Chemistry Research Laboratory**

Organic Solvent Transfers  
Enzyme Optimization

**Scorpion**

Synthetic Chemistry  
HTS / Kinetics / LC-MS

**Cobra  
1- or 4-Channel**

Biochemical Assays  
PCR Master Mix

## Selection of accessories and general devices

Complete line of **replacement syringes and syringe barrels** for your "Phoenix", "Gryphon", "Cobra" or "Hydra" instrument. Full syringes or barrels are available in all sizes (100 µl, 250 µl, 500 µl, or 1 ml) with either PTFE coated stainless steel or flexible Nitinol needles.

**Hanging drop tool** and seals for hanging drop applications.

**LCP Mixing Station** and **LCP Hand-held Dispenser** as well as other accessories for LCP applications.

Please ask for further details on Art Robbins Instruments' accessories for devices and for LCP-applications.

## Tissue Typing

Art Robbins Instruments also offers a wide range of products for Tissue Typing applications.

**Stream splitter** with 6, 8 or 12 needles for 36-, 60-, 72- and 96-well plates

Single and Multiple **Hand-held Syringe Dispensers**

Serum- and Micro centrifuge tubes in different colours

**Complement Cooling System** and Accessories

**Automatic Oiler** and **Refurbished Serum Dispenser**

Please contact us and ask for our brochure on the Tissue Typing products from Art Robbins Instruments.
