

Product Overview

Antibodies for various Research Disciplines:

- Angiogenesis
- Apoptosis
- B-Cells
- Cancer and Tumour Biology
- Cell Adhesion
- Cell Cycle
- Cytokines
- Cytoskeletal Proteins
- DNA Repair
- EGFR Family
- Enzymes
- Epitope Tags
- Extracellular Matrix
- G Protein-Coupled Receptors
- Growth Factors
- Hematopoietic
- Immunoglobulins
- Infectious Diseases
- Inflammation
- Junction Proteins
- Muscle Biology
- Negative Controls
- Neurosciences
- Nuclear Receptors
- Oncogenesis
- Proteases and Inhibitors
- Signal Transduction
- Steroid Hormones
- Stress Responses
- T-Cells
- Transcription Regulation

ULTRAVISION

- Primary Detection Systems for Immunohistochemistry
- Epitope Recovery Products, Blocking Reagents

- Many antibodies are IVD/CE certified.
